YouTube Content Ideas

Three video ideas synthesised by the agent from the rest of this PDF, engineered to plausibly hit 10M views. Each ships with a hook, a thumbnail concept, and a 5-beat outline you can shoot the same week.

1. The US Just BANNED the World's Best AI (What Now)

HOOK (FIRST 8S)

The most powerful AI on Earth was live in India for 72 hours, then the US government pulled the plug. Here's exactly what happened and how to build without it.

Why it hits 10M: ['anthropic_claude_news: the Fable 5 / Mythos 5 access ban is the single biggest AI story of the cycle with built-in global controversy and stakes.', 'ai_search_trends: 'what is claude fable 5' and 'microsoft anthropic claude fable restriction' are top rising global+India queries right now - pure search demand.', 'indian_ai_industry: India-vs-US sovereign-AI framing taps a huge, emotionally invested audience that shares aggressively.']

Thumbnail: Split screen: a glowing 'FABLE 5' logo cracked down the middle with a red 'BANNED' stamp, shocked face in the corner.

- Cold open: the 72-hour access window and the exact moment it was cut.
- Who pulled the trigger - Amazon + five firms reportedly warned the government.
- What India actually loses (IT services, enterprises) and why it matters globally.
- Live demo: rebuild the same workflow on models you CAN still access.
- Takeaway: never single-source your AI stack - the 2-minute resilience checklist.

2. AI Wrote This \$2M Report. Every Fact Was Fake.

HOOK (FIRST 8S)

KPMG and a top consulting firm shipped AI reports to real clients - and the AI made up the case studies. I'll show you the exact failure and how to catch it.

Why it hits 10M: ["unaddressed_ai_problems: KPMG's fabricated case studies + a consulting firm's hallucinated report are concrete, jaw-dropping failures that scream 'this could be you'.", 'anthropic_claude_news: the study showing AI coding agents miss the exact lines that matter proves the reliability gap is systemic, not a one-off.', 'ai_business_automation: every business shipping AI-written work needs the verification layer this video teaches - broad, evergreen demand.']

Thumbnail: A glossy corporate report on fire with a big red 'FAKE' watermark and the caption 'AI made this up'.

- Hook: the \$2M report where every cited case study was invented.
- Why hallucination survives review - no provenance layer in the workflow.
- Second example: AI coding agents that find the file but break the lines.
- Build a verification pass in Claude Code that flags unsourced claims.
- Checklist: ship AI work clients can trust without getting burned.

3. I Automated a Warehouse With AI in One Weekend

HOOK (FIRST 8S)

Amazon is pouring money into AI warehouse automation in India - so I rebuilt a slice of it on my laptop in a weekend. Here's the whole no-code build.

Why it hits 10M: ["ai_business_automation: Amazon expanding AI inventory automation + Magicpin's Vera assistant scaling to 10 lakh merchants are real, relatable deployments viewers can copy.", "ai_search_trends: 'what is ai automation' and 'what is ai agents' are top rising queries globally and in India - direct how-to demand.", "new_ai_tools: Google Cloud's Open Knowledge Format makes the agent-feeds-on-docs build legitimately doable now, giving the tutorial a fresh hook."]

Thumbnail: Me pointing at a laptop showing a glowing agent flowchart next to a warehouse robot, big text 'ONE WEEKEND'.

- Hook: the Amazon + Magicpin deployments and the 'I copied it' promise.
- Map the real workflow: inventory signals in, decisions out.
- Wire it up no-code with an agent + Open Knowledge Format docs.
- Live run: the agent reorders stock and flags demand spikes.
- How to package this as a paid service for a local business.
